

2026

SANTA FE

For the crew that stands out while getting out there.

Stand-apart style on top of do-anything capability. It's no secret what makes the 2026 Hyundai Santa Fe special, especially with a design that attracts so much attention. You can see its distinction chiseled on surfaces that express equal parts Sport and Utility. One look at its chrome grille pattern, signature H-shaped headlamps and LED taillights tells you Santa Fe is ready to trek into the future with confidence.

Step inside Santa Fe, and you'll quickly see what else makes it special. Three rows of seating for up to seven passengers – family-sized space in a mid-sized package. In back, a terrace-like cargo space adds an expansive area for camping and tailgating. This is roominess that invites you to roam, ready for everyday adventures around town and beyond city limits.

Whether you're running errands or escaping for the weekend, you will delight in the innovation that surrounds you. An available Panoramic Curved Display integrates

12.3" digital instrument cluster and infotainment system displays into a fluid curved screen oriented toward the driver. Want more peace of mind on every journey? Santa Fe comes with Hyundai SmartSense, a comprehensive suite of safety and driver-assist technologies that includes advanced features like available Highway Driving Assist¹ and Remote Smart Parking Assist².

Santa Fe hybrid and gas-powered models also give you wide-ranging choices to fit your needs. An SE base trim comes with abundant standard equipment. Santa Fe SEL adds even more popular features and value. The XRT trim ups the ruggedness with standard All Wheel Drive and off-road styling additions, while Limited and Calligraphy trims offer our highest levels of premium content.

The secret is out about the Hyundai Santa Fe, a 2025 North American Utility Vehicle of the Year™ Finalist. So get out there and find out for yourself.

Two roads to adventure: Hybrid electric. Or gas.

Hyundai Santa Fe is available with your choice of compelling powertrain options. Want your new Santa Fe in electrified form? Santa Fe Hybrid models pair a 44.2 kW electric motor and high-voltage lithium ion battery pack with a turbocharged Smartstream 1.6L inline-four engine and 6-speed automatic transmission to deliver a combined output of 231 horsepower and 271 lb-ft of torque.

Equally impressive is its fuel-efficiency – up to an EPA-estimated 37 MPG around town.³ With Hybrid EV efficiency and the availability of HTRAC All Wheel Drive, Santa Fe Hybrid is designed for enjoying the outdoors – and protecting the environment.

If more horses under the hood is what you prefer, Santa Fe rewards you with a gasoline-powered 277-horsepower Smartstream 2.5L Turbo. Its 311 lb-ft of torque delivers a maximum towing capacity of up to 3,500 pounds.⁴ Need more towing capacity? Santa Fe XRT tows up to 4,500 pounds.⁴ Trailer Sway Control comes standard on every trim level.⁵

Santa Fe's Drive Mode Select lets you dial in your driving dynamic. Select Sport mode for more aggressive throttle response and shift points. The My Drive mode lets you customize powertrain settings and steering feel to your taste.

Got snow? On models equipped with available All Wheel Drive, Snow mode optimizes traction for driving on wintry roads. Like to venture way out there? Terrain Mode on the XRT trim allows you to select specific AWD settings for mud and sand.

However far and wide you traverse, you'll enjoy a hushed ride thanks to Santa Fe's attention to acoustic details. Everything from the design of subframe bushings and engine mounts to the shape of the windshield helps isolate you from harsh road vibrations and wind turbulence. So there's less noise. And more poise.

The best way out there? In here.

At Hyundai, we know how you get to the Great Outdoors is as important as actually being there. So we made Santa Fe's inside a rewarding and easy space for travel. Its long wheelbase provides exceptional legroom for passengers in the 2nd and 3rd rows. And the available 2nd-row power folding captain's chairs feature a cushion angle adjustment, so you're likely to hear 'ahhs' of relaxation to go with 'oohs' for the scenery.

Santa Fe's available dual automatic temperature control with 2nd- and 3rd-row air vents quickly achieves the perfect cabin temperature. Throughout the interior, eco-friendly materials create soft-to-the-touch surfaces on the headliner, instrument panel, doors and seats. The modern amenities extend to high-power USB charge ports in the first two rows – standard on every Santa Fe trim level. There are even available USB ports for the third row.

Beyond its conveniences and spacious comfort, Santa Fe prioritizes cargo loading with wider rear access. A hands-free power liftgate with auto open lets you customize the opening height.⁶ And fully foldable 2nd- and 3rd-row seats create a terrace-like space at the rear liftgate opening. Between the front seats, there's another innovation from Hyundai Design: The first bi-directional, multi-level center console storage space that can be opened by either front or rear passengers.

Up top, an available power dual-pane sunroof makes it easy to let the outdoors inside. Outside, grab handles concealed within the exterior C-pillar are available to help reach any cargo stowed on the raised roof side rails.⁷ This is smart space design for the open spaces.

Find new angles on safety.

The 2026 Santa Fe features a suite of advanced safety and driver-assistance technologies known as Hyundai SmartSense. It's an integrated system of cameras, radar sensors and ultrasonic sensors that monitor your surroundings from nearly every angle to help protect you and your passengers.⁸

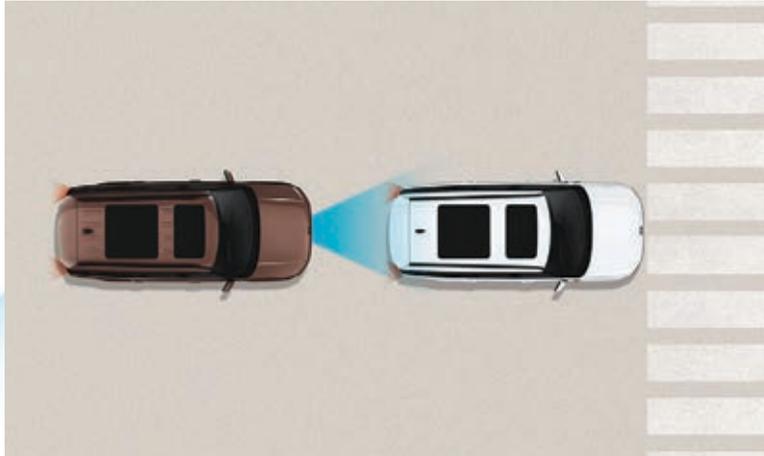

Santa Fe Limited and Santa Fe Calligraphy exemplify the SmartSense approach to safety by enhancing standard Blind-Spot Collision Warning⁹ with a Blind-Spot View Monitor¹⁰ that displays video within the instrument cluster

of what's happening alongside your SUV. Both trims are also equipped with a Surround View Monitor¹¹ and forward/side/reverse parking sensors that help you confidently navigate crowded parking areas.

The innovation doesn't stop there. Santa Fe features a Driver Attention Warning¹² system that monitors driving attentiveness and warns when you might need to take a break. The Calligraphy trim level even includes a camera-based rearview mirror that helps improve night vision and offers clear views behind your vehicle when the rear seats or cargo area are full.

Hyundai SmartSense Technologies

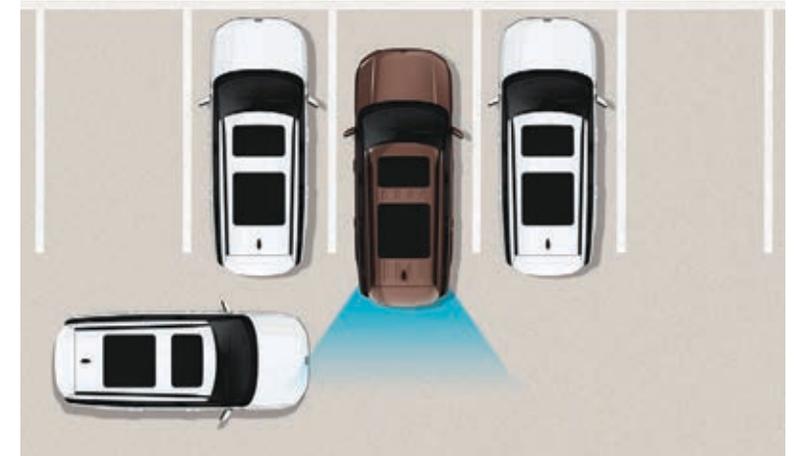

1. Forward Collision-Avoidance Assist

When the front-facing camera and radar detect a vehicle, pedestrian or cyclist in your path, or an oncoming car when turning left in an intersection, your Hyundai warns you of a potential collision. If necessary, the system may automatically apply emergency braking to help avoid a collision.¹³

2. Blind-Spot Collision Warning

If your Hyundai detects a vehicle in your blind spot while the turn signal is on, it issues an alert before you change lanes to help avoid a collision. It also monitors for vehicles approaching from behind to help prevent collisions when you are pulling out of a parallel parking spot.⁹

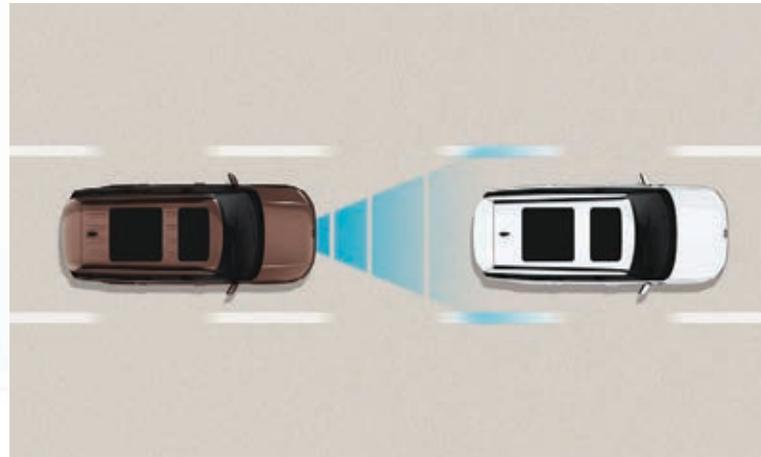

3. Rear Cross-Traffic Collision-Avoidance Assist

Backing out of a parking space and wondering whether there is cross traffic coming your way? This feature helps warn you of another vehicle approaching from the side. If necessary, your Hyundai may automatically apply braking to help prevent a collision.¹⁴

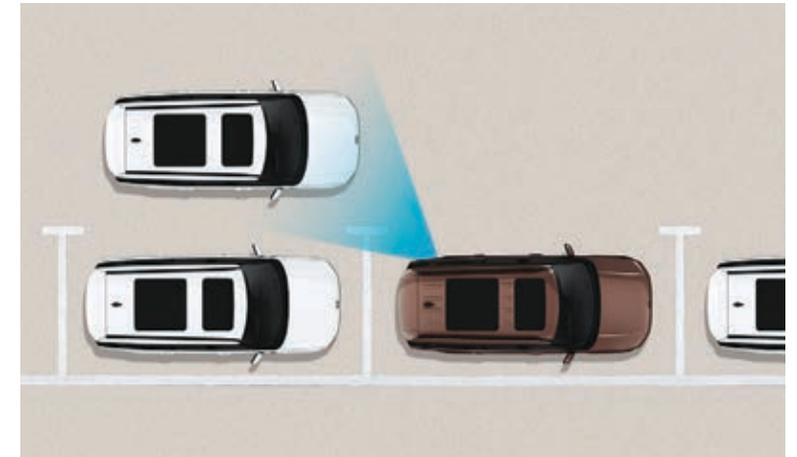

4. Lane Following Assist

Using Santa Fe's front-facing camera to detect lane markers on the road, this feature assists the driver's steering to help keep you centered in your lane. It even helps determine a virtual path based on the movements of the preceding vehicle.¹⁵ Meanwhile, haptic feedback through the steering wheel helps remind you to keep your hands on the wheel.

5. Highway Driving Assist

Acting as your copilot on freeways, this available feature helps keep you centered in your lane while also maintaining a set speed and distance from the vehicle in front. It can use navigation map data to automatically adjust for changing speed limits and reduce your speed when it detects you're approaching a curve in the road. The system can even respond to vehicles that drive too close in the adjacent lane and assist in making lane changes.¹

6. Safe Exit Assist | Advanced Rear Occupant Alert

After you park, Safe Exit Assist issues an alert when a vehicle is detected to be approaching from behind, letting the driver know it may not be safe for passengers to open the street-side door.¹⁶ An available Advanced Rear Occupant Alert feature can help remind the driver to check the 2nd-row seats for kids or pets after turning off the engine.¹⁷

Escape to luxury. Santa Fe offers you two ways.

If you prefer a bit more refinement in your adventures, start with Santa Fe Limited. Everyone is greeted by luxuries like premium leather seating, ventilated front seats and heated 2nd-row seating. The driver is treated to a heated steering wheel and an Integrated Memory System for the power driver seat.

Looking for something stunning? A panoramic curved screen integrates two bright 12.3" displays – one for gauges and one for infotainment. Need to back into a tight parking space? Let Limited's Remote Smart Parking Assist do the work.² When you're ready to rock, a Bose® 12-speaker premium audio system offers big, bold sound. For the ultimate in entertainment, Wi-Fi + Streaming¹⁸ lets you connect all of your devices, even tablets and computers, and stream your favorite content. It will also stream Amazon Music and SoundCloud directly through your sound system.

Santa Fe Calligraphy adds another level of premium features. Quilted Nappa leather seating surfaces cradle everyone in comfort, while a Driver Relaxation Seat distributes your body pressure to simulate a weightless position – optimal for resting. Power-reclining captain's chairs delight those seated in the 2nd row.

Calligraphy relaxes you in innovative ways as well. There's no need to take your hands off the steering wheel – or your eyes off the road – to touch a screen or buttons. Dynamic Voice Recognition lets you control infotainment and vehicle functions using voice commands,¹⁹ while a 12" color Head-up Display projects driving vitals onto the windshield in fighter-jet fashion so you can keep looking forward.

Introducing Bluelink+: No fees. No trial. No worries.

With the introduction of Bluelink+, Hyundai has become the first automotive brand to offer its suite of connected car features to new car purchasers at no extra cost. Bluelink is complimentary with the purchase of your new 2026 Hyundai Santa Fe.²⁰

Bluelink features technologies designed to help keep you safe – from automatic collision notifications and automatic emergency assistance if your airbags deploy, to enhanced roadside assistance that sends your exact location to a roadside assistance associate.²¹ Bluelink also includes helpful maintenance features like remote diagnostics and monthly vehicle health reports. All complimentary with your 2026 Santa Fe new-vehicle purchase for the life of the supporting wireless network technology.²²

Our MyHyundai with Bluelink app turns your compatible smartphone, smartwatch or home assistant device into a Bluelink remote control that can unlock your Santa Fe's doors – even start the vehicle and climate controls – before you leave your house, office or restaurant.²³

Enter your Santa Fe using a compatible smartphone or wearable device equipped with our available Digital Key 2 Premium, and your radio and navigation presets are automatically restored via your Bluelink personal profile.²⁴ Apple Wallet,[®] Google Wallet[®] and Samsung Pass[®] let you share your digital key with trusted friends and family members²⁵ – as the primary driver, you control when a shared key can be used, paused or canceled.

Bluelink

Automatic Emergency Assistance

Bluelink+ offers you 24/7 SOS Emergency Assistance as well as Automatic Collision Notification that can call for help if you're in an accident where your vehicle's airbags deploy.²¹

Over-the-Air Software Updates

Convenience is elevated with Over-the-Air software updates that keep your infotainment and available navigation system up-to-date without requiring a dealership trip.²⁶

Driver Profile Management

Save navigation searches, radio presets and driver seat position settings to your secure Bluelink account, and you can remotely update and push them to your Hyundai.

Remote Vehicle Controls

Use your smartphone, smart speaker or wearable device to remotely start your Hyundai's engine, set the cabin temperature, activate the heated front seats and more.²⁷

Remote Vehicle Status

Wondering how much fuel is in your tank? If the liftgate is closed or the available sunroof is open? Your MyHyundai with Bluelink app quickly puts those answers at your fingertips.

Hyundai Pay

Paying for fuel or parking is easy with the Hyundai Pay feature. It lets you find and complete payments for fueling or reserve parking directly from your vehicle touchscreen.²⁸

Hope comes standard on every Hyundai.

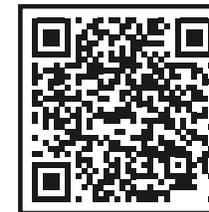

Each time we sell a Hyundai, a portion goes to Hyundai Hope On Wheels® to help find a cure for childhood cancer. Over the last 27 years, Hyundai Hope On Wheels has donated \$275 million to pediatric cancer research. Hope is our greatest feature. And it comes standard on every Hyundai.
